[Title of Utility Model]

Ceramic heater supporting apparatus

[Claims]

1. An apparatus for supporting a plate-shaped ceramic heater (4), comprising a ceramic heater support (1) having a U-shaped cross-section, and having protrusion walls (12) protruding toward counterpart standing walls (11) on both standing walls (11); a ceramic pressing body (2) located in the ceramic heater support (1) and having both edges (21) inserted under the protrusion wall (12); and a spring pin (3) forcibly inserted between the protrusion wall (12) of the ceramic heater support (1) and the both edges (21) of the ceramic pressing body (2), wherein a distance between a lower surface of the protrusion wall (12) and the both edges (21) of the ceramic pressing body (2) is gradually increased/decreased from a leading end of the protrusion wall (12) to the outside of the ceramic heater support (1).
